

MAGNETIC TAPE WHITE- 20 MM X 1 M

DESCRIPTION

The magnetic strip is made of strontium ferrite, the front side is laminated with light-resistant PVC. You can easily cut it to the desired length with household scissors and write on it with a pencil, ballpoint pen or whiteboard marker. The writing can be removed with ethyl alcohol, methylated spirits or an eraser, but some traces may remain. For permanent marking of the magnetic strip, permanent markers are best.

TECHNICAL DETAILS

- Length 1M
- Width 20MM
- Thickness 1MM
- Type of magnetization Anisotrope
- Adhesion force 80g/cm²
- Weight 74g/M
