

KEM-STRIPPER GEL SAFE 5L

DESCRIPTION

- KEM-STRIPPER GEL SAFE is used for the removal of water-based and polyurethane paints. Suitable for removing from floors, grids, application and preparation equipment.
- Appearance: Light orange liquid, slightly thixotropic
- PH: acid < 2
- Density: 1.0
- VOC content: 840 g/l (2004/42/EC - II B a) preparatory products: 850 g/l maximum)
- Flash point: 41°C

USAGE

- KEM-STRIPPER GEL SAFE can be used pure, dipping or spreadable and at room temperature.
- The stripping time depends on the thickness and nature of the paint to be removed. Average working time: 5 to 15 minutes.
- NOTE: After removing paint layers, stripped surfaces may remain slightly slippery. Rinse with water if necessary.
- DANGER: Do not run water into the bath.
- Work in a ventilated area.
- In the cabin and laboratory, use ventilation.
- Wear protective gloves and safety glasses.
- For further information, refer to the safety data sheet
